# SAFE USE OF ONLINE GAMES AND PLATFORMS

LOTS OF PEOPLE LOVE ONLINE GAMES...

# ROBLOX

# ROBLOX - GUIDANCE TO MANAGE AND STAY SAFE

- Disable messages if there are any concerns. Setting can be set to only talk to known friends.
- Set the **parental controls** - moderate who can talk to and which games they can play. To enable these, add your email address to your child's account through the security menu and create a pin to stop settings being altered. In the privacy menu apply moderation to in-game chat, personal messages, invites and more.
- Do foster and encourage creativity - great place to start game design!

# ROBLOX - HOW TO...

## Adding a PIN to your account

- Click the **Gear icon** in the upper right corner and click **Settings**
- Select **Security** in the menu on the left-hand side of the screen
- In the **Account PIN** section, press the **Toggle** button
- You will be asked to **create and confirm the PIN**
- When you're done, press **Add**

All account settings are protected by the account PIN, which will need to be entered in order to make any changes.

Creating a PIN requires a verified email address. You will be prompted to add and verify your email if the account does not have one.

# ROBLOX

Use the Roblox checklist to check privacy and safety settings.

Available in folder via QR link.

# Safety Tips For Parents

## BLOCK STRANGERS AND UNWANTED CONTACT

Despite the fact that private messages can no longer be sent in the game, strangers may still attempt to interact with your child. From the pause menu, players can block chat and friend requests from others in the game. This causes any profanities, email addresses and phone numbers to become automatically blocked, meaning it's harder for people you don't know to potentially contact your child.

## LEARN FROM YOUTUBERS / TWITCH STREAMERS

There are a lot of Minecraft focused YouTubers and Twitch Streamers that offer a huge variety of fun, engaging content. Many of them focus on making videos specifically for younger audiences, which don't include bad language or anything scary. If you're unsure about the game, check out some of the biggest streamers and more importantly, ask who your children like. This will help you to understand what the game is about and also make sure that your children are watching age-appropriate content online.

## PLAY IN CREATIVE OR PEACEFUL MODES

Playing the game on Creative or Peaceful mode ensures that the experience is strictly safe. Peaceful mode allows children to explore with friends without having the survival element of normal Minecraft, while Creative mode allows imaginations to run wild with unlimited resources, encouraging creation of vast, personalised worlds. There really are no limits as to what can be accomplished and getting involved yourself can make it a great way to bond with your child and give you a long-term project to complete with them.

## MONITOR GAME TIME

Being able to play on a wide variety of platforms can be beneficial however it can also make it more difficult to put the game down. Play time should be monitored and it's always a good idea to talk to your child if you feel they are spending too much time on the game or showing signs of addictive behaviour.

## CREATE A PRIVATE SERVER

The best way to avoid unwanted strangers or griefers in a server is to simply create your own. Private servers do exactly what they say on the tin by offering a safe, secure place for children to play and create with their friends, free from outside interference. They (and you) control who is allowed in the server and what kind of things they can do in it, making it the closest thing Minecraft offers to parental controls.

## LEARN TO PLAY YOURSELF

Minecraft is an incredibly easy game to pick up and play. Furthermore, it doesn't require an expensive console or computer, with versions available for smartphones and tablets. Learning to play yourself and playing alongside your child is the best way to understand the game and will help to put your mind at ease in respect of what your child is viewing and who they may be interacting with.

## CREATE SERVER WHITELISTS

Usernames you know to be safe, like your child's friends or relatives, can have their accounts whitelisted as safe. Essentially, this means that server moderators can create a community made up of people they know to be friendly and children will only be playing alongside people both they and you know, reducing any risk of contact with strangers or experiencing griefing.

# FURTHER SUPPORT AND RESOURCES: NATIONAL ONLINE SAFETY

## Hundreds of online safety guides

Instant access to all of our award-winning guides, absolutely free, providing advice and guidance on the latests apps, games, platforms and devices.

## Free parents course

Made up of four mini-courses, our online safety course for parents & carers focuses on how children from age 4 to 18 will use, engage with, and potentially be at risk by their online activity.

## Everything you need to know in one place

Favourite your chosen guides and training to make your interface bespoke to you.

### Online Safety

The world is growing up in an increasingly more technical world...

life online in the ever changing technical world.

[Online Safety Policy](#)

The development of technology has opened up a new world of endless possibilities for research, learning and discovery. Our pupils are growing up in an increasingly more technical world...

Unfortunatly our pupils being contacted by people that they do not know, who maybe older than them etc. Through our teaching of IT in the curriculum and Online Safety awareness days, we hope to empower both our pupils and parents to talk more openly about their experiences online.
