Online safety information for parents

At Dawley, we take the online safety of our pupils very seriously.

Our pupils use Purple Mash learning platform because all the applications, activities and learning videos are all within the platform with no external links to other sites or resources. Our pupils can be contacted through Purple Mash by their class teacher as they comment on 2Do's (work set) that they have completed, this gives our pupils feedback on their work and guides them to the next task.

Our computer systems within the academy are filtered and monitored by Telford and Wrekin Council. Each of our pupils also have their own login to access our computer systems.

Each month we send out an online safety newsletter with up-to-date information for parents about apps, games and latest trends. These are also available on our website to download.

If you or your child have any concerns about anything they have seen online, there is a CEOPs reporting button on both our Academy webpage and our online safety page. You can also report any concerns to the Academy office.
